

MLS Listings in the Palm of Your Hand!

Paragon[®] Wi-Fi

Paragon[™] Wi-Fi is an interface that allows real-time access to Paragon[™] MLS data from any browser-enabled device, such as a WAP-enabled mobile phone (i.e. a Blackberry or a Treo) or a PDA.

Paragon[™] Wi-Fi is not a substitute for the online Paragon[™] system, but rather a companion product that will allow mobile users the ability to search and retrieve a limited portion of MLS listing data.

If you have access to the Internet from your phone or PDA, there is no additional cost for this service.

Simply enter <http://scwmls.fnismls.com/paragonwifi> and use the same login name and password you use to access Paragon[™].
